<https://www.linkedin.com/in/tanishqbug/> <https://github.com/TanishQcode>

Full Stack .NET Developer with 3+ years of experience in designing and developing scalable enterprise systems using C, .NET Core, SQL, and Angular. Skilled at architecting high-performance applications and accelerating delivery through AI-powered workflows and prompt engineering (GPT-5, Copilot, Windsurf, Cursor). Proven ability to optimize development processes, deliver high-quality solutions, and enhance team productivity through automation and clean architecture principles.

TECHNICAL SKILLS

Languages: C#, TypeScript, JavaScript, SQL, PSQL (PostgreSQL), HTML, CSS, C/C++.

Frameworks & Libraries: .NET Core, ASP.NET, ASP.NET Core, MVC, Web API, Entity Framework (EF6, EF Core), Dapper, Angular, NgRx, RxJS.

AI & Automation: Prompt Engineering, GPT-5, GitHub Copilot, Windsurf, Cursor — AI-assisted cross-stack coding and refactoring.

CMS & Platforms: Umbraco, PrestaShop (custom modules).

Tools: Git, GitHub, Sourcetree, Bitbucket, JIRA, Visual Studio, Postman, Swagger, Figma, IIS, SignalR.

EXPERIENCE

Digiwhiz

Jul 2024 – Present

.Net Full Stack Developer

Ahemdabad · On-site

- Spearheaded backend development of a full-scale travel booking platform, delivering a robust, scalable architecture.
- Built and maintained a comprehensive back-office management system with role-based access control (RBAC) and multi-tiered architecture for agent operations.
- Led migration from .NET Framework 4.x to .NET 8, leveraging C 9+ features to improve performance and maintainability.
- Integrated Entity Framework Core (EF Core) to streamline data access and reduce boilerplate across services.
- Developed and optimized stored procedures and service wrappers for mission-critical data operations, improving query efficiency and reuse.
- Developed and customized PrestaShop (PHP) modules, CMS pages, and theme features without prior PHP experience, demonstrating rapid cross-stack learning and ownership.
- Leveraged AI-assisted development and prompt-engineering (GPT-5, Copilot, Windsurf, Cursor) to accelerate coding, debugging, and documentation — achieving 2× productivity gains.
- Implemented microservices and event-driven patterns within the Umbraco ecosystem to increase modularity and future scalability.

JVS Technologies (HMS-Product)

Apr 2023 – May 2024

.Net Full Stack Developer

Ahemdabad · On-site

- Contributed to the development of a healthcare management system, working in Agile teams to design and implement new modules and features.
- Enhanced product functionality by fixing bugs and optimizing code performance.
- Developed complex CRUD APIs and wrote advanced SQL queries, including stored procedures, CTEs, and functions.
- Utilized RxJS and NgRx for state management and improved responsiveness.

smartData Enterprises

Jul 2022 – Apr 2023

Dotnet Full Stack

Nagpur · On-site

- Employed agile methodologies to deliver high-quality software within tight deadlines, collaborating efficiently with cross-functional teams.
- Integrated and optimized third-party services including Twilio for communication and Square Payment Gateway for secure transactions.
- Developed complex CRUD APIs and wrote advanced SQL queries, including stored procedures, CTEs, and functions
- Conducted rigorous API testing and debugging, ensuring robust and efficient performance.

PROJECTS

Zeal Travels - A Travel Booking Site 🔗

- Developed B2B travel booking platform with multi-city, round-trip, and one-way flight booking functionalities.
- Built back-office management system for agent operations, incorporating role-based access control (RBAC).
- Applied Onion Architecture for clean separation of concerns, scalability, and maintainability.
- Utilized Entity Framework Core for streamlined database interactions and reduced boilerplate code.
- Created and optimized custom reports with dynamic filtering and export functionality for data analysis.

SoftClinic GenX (HMS) 🔗

- Created and optimized complex CRUD APIs to manage hospital data effectively.
- Designed and implemented SOAP notes management and integrated various third-party services for enhanced functionality.
- Designed and built appointment scheduling functionality for seamless patient bookings.
- Developed custom modules for doctors, enhancing workflow efficiency and data management.
- Utilized .NET Core, Angular, SQL Server, Entity Framework Core, Postman, and Swagger for full-stack development.
- Added and enhanced multiple new features to improve usability, efficiency, and overall system performance.

C-Vision International 🔗

- Enhanced Umbraco CMS back-office to improve event management functionalities for members and visionaries.
- Updated speaker display logic on event pages, ensuring dynamic and accurate information presentation.
- Improved Agenda Session API, optimizing performance and reliability for event schedules.
- Added Shopping Cart functionality for Events

Cooper Black – B2B eCommerce Platform (PHP / PrestaShop) 🔗

- Maintained and enhanced a PrestaShop-based B2B eCommerce system, handling complete backend logic, module configuration, and content workflows.
- Developed custom modules, profile page mapper, and widget creator with reusable components for dynamic UI rendering.
- Implemented new features and optimized existing modules to improve scalability, maintainability, and user engagement.
- Handled the entire backend and B2B transaction flow, ensuring secure data management, efficient API communication, and smooth CMS integration.
- Utilized AI-assisted development workflows with GPT-5, Copilot, Windsurf, and Cursor to implement complex PHP logic without prior PHP expertise, achieving rapid delivery and 2× productivity gains.

Cheder Levi Yetzchok (Jewish Education) 🔗

- Developed a donation functionality for users to contribute to the education of Jewish children, integrated Square payment gateway for secure processing, fixed and optimized bugs, and added AUD and USD currency options for the donation form.

EDUCATION

SAGE University

BTech-IT (8.53)

Oct 2019 – May 2023

Indore, M.P.

Garima Vidya Vihar

HSC - CBSE

Apr 2017 – Apr 2019

Indore, M.P.
